Entrepreneurial ecosystems have recently received considerable attention from scholars and policymakers. This study sheds light on public accelerators as anchor tenants of entrepreneurial ecosystems and aims at investigating their roles in the early ecosystem evolution. Based on a single case study with the Santiago entrepreneurial ecosystem in Chile, this study reveals five steps in which public accelerators orchestrate resources and develops a framework of the role of public accelerators in the evolution of entrepreneurial ecosystems.

The Oxford Handbook of Australian Politics is a comprehensive collection that considers Australia's distinctive politics— both ancient and modern— at all levels and across many themes. It examines the factors that make Australian politics unique and interesting, while firmly placing these in the context of the nation's Indigenous and imported heritage and global engagement. The book presents an account of Australian politics that recognizes and celebrates its inherent diversity by taking a thematic approach in six parts. The first theme addresses Australia's unique inheritances, examining the development of its political culture in relation to the arrival of British colonists and their conflicts with First Nations peoples, as well as the resulting geopolitics. The second theme, improvization, focuses on Australia's political institutions and how they have evolved. Place-making is then considered to assess how geography, distance, Indigenous presence, and migration shape Australian politics. Recurrent dilemmas centres on a range of complex, political problems and their influence on contemporary political practice. Politics, policy, and public administration covers how Australia has been a world leader in some respects, and a laggard in others, when dealing with important policy challenges. The final theme, studying Australian politics, introduces some key areas in the study of Australian politics and identifies the strengths and shortcomings of the discipline. The Oxford Handbook of Australian Politics is an opportunity for others to consider the nation's unique politics from the perspective of leading and emerging scholars, and to gain a strong sense of its imperfections, its enduring challenges, and its strengths.

Public School Laws of North Carolina is an ideal volume for North Carolina Education professionals, state education employees, and attorneys with an education law practice. This fully annotated and indexed edition was compiled for the North Carolina Education Community from the official General Statutes of North Carolina. It contains Chapter 115C, Elementary and Secondary Education, with a Table of Comparable Sections and numerous related statutes on a wide range of issues. No other North Carolina publication brings together such a broad range of relevant education law in a handy, easy-to-use format.

Has politics reached breaking point? Rather than defending liberalism or abandoning it, how can a socially just and ecological alternative be built? Peadar Kirby investigates the causes of our current multifaceted global crisis by drawing on the work of Karl Polanyi. This book explores Polanyi's theory that social disruptions result from the attempt to run society according to the rules of the market. Drawing on these ideas, it outlines pathways towards an alternative future that overcome weaknesses in Marxism. Linking the ecological, political and socio-economic crises, Kirby identifies that an alternative socio-ecological model is emerging, consistent with the insights of Polanyi. Karl Polanyi and the Contemporary Political Crisis is an urgent intervention into key debates on the future of politics, on the low-carbon transition, on automation and on the emerging world order.

Bitcoin, the brainchild of Satoshi Nakamoto, is as unfathomable as its elusive creator. Is it an instrument of exchange, like currency notes, or is it an investment tool? While many of us could still be grappling with the concept of cryptocurrency, fortunes have already been built and lost; lives have been impacted and, in some cases, ruined in this whole new uncharted universe of digital money. Piecing together published information from various sources, The Bitcoin Dystopia: The Prelude offers a bird's eye view of the current state of affairs with regard to cryptocurrency and the larger world in which it is situated. At the same time, the book makes a bold prediction about the future of the world through a provocative storytelling approach that is atypical of non-fiction. Bitcoin is unorthodox and any attempt to grasp its impact should be anything but conventional.

In the newly revised 19th Edition of Contemporary Business, a distinguished team of business experts delivers an accessible and intuitive introduction to central concepts in business and management. Designed to engage with and cultivate interest in the world of business, the book explores topics as varied as entrepreneurship, promotion and pricing strategies, the role of technology in modern business, and customer-driven marketing.

2018-2019 Planner now here! (August 2018 to July 2019) Start planning today with this beautiful 2018-2019 Weekly Planner with weekly and monthly views! This calendar schedule organizer and journal is 8x10, a perfect travel size and includes plenty of space for all of your important dates. This beautiful planner is printed on high quality interior stock with a beautiful cover. How a bottom-up problem-solving ethos, multidisciplinary approach, and experimental mindset has nurtured entrepreneurship at MIT. MIT is world-famous as a launching pad for entrepreneurs. MIT alumni have founded at least 30,000 active companies, employing an estimated 4.6 million people, with revenues of approximately \$1.9 trillion. In the 2010s, twenty to thirty ventures were spun off each year to commercialize technologies developed in MIT labs (with intellectual property licensed by MIT to these companies); in the same decade, MIT graduates started an estimated 100 firms per year. How has MIT become such a hotbed of entrepreneurship? In *From the Basement to the Dome*, Jean-Jacques Degroof describes how MIT's problem-solving ethos, multidisciplinary approach, and experimental mindset nurture entrepreneurship. Degroof explains that, at first, the culture of entrepreneurship sprang from such extracurricular activities as forums, clubs, and competitions. Eventually, the Institute formally supported these activities, offering courses in entrepreneurship. Degroof describes why entrepreneurship is so uniquely aligned with MIT's culture: a history of bottom-up decision-making, a tradition of academic excellence, a keen interest in problem-solving, a belief in experimentation, and a tolerance for failure on the way to success. Entrepreneurship is the logical outcome of MIT's motto, *Mens et Manus* (mind and hand), translating theories and scientific discoveries into products and businesses--many of which have the goal of solving some of the world's most pressing problems. Degroof maps MIT's current entrepreneurial ecosystem of students, faculty, and researchers; considers the effectiveness of teaching entrepreneurship; and outlines ways that the MIT story could inspire conversations in other institutions about promoting entrepreneurship.

The concept of risk in global life has not been fully understood and explored and this book attempts to examine what it entails in the fast changing, interconnected and complex world. As a foundational component of safety systems, risk has been considered relatively simple, predictable, and therefore, assessable and manageable phenomenon. Social and political sciences prefer the terminology of security to capture the dimension of risk which is more complex and more consequential to survival. Risk has become more human-made and intentional today, and this book explores innovative approaches and engages in theoretical and policy debates to capture its political and security dimensions.

A unique, wide-ranging examination of asteroid exploration and our future in space Human travel into space is an enormously expensive and unforgiving endeavor. So why go? In this accessible and authoritative book, astrophysicist Martin Elvis argues that the answer is asteroid exploration, for the strong motives of love, fear, and greed. Elvis's personal motivation is one of scientific love--asteroid investigations may teach us about the composition of the solar system and the origins of life. A more compelling reason may be fear--of a dinosaur killer-sized asteroid hitting our planet. Finally, Elvis maintains, we should consider greed: asteroids likely hold vast riches, such as large platinum deposits, and mining them could provide both a new industry and a funding source for bolder space exploration. Elvis explains how each motive can be satisfied, and how they help one another. From the origins of life, to "space billiards," and space sports, Elvis looks at how asteroids may be used in the not-so-distant future.

The two-volume set LNAI 13067 and 13068 constitutes the proceedings of the 20th Mexican International Conference on Artificial Intelligence, MICA I 2021, held in Mexico City, Mexico, in October 2021. The total of 58 papers presented in these two volumes was carefully reviewed and selected from 129 submissions. The first volume, *Advances in Computational Intelligence*, contains 30 papers structured into three sections: – Machine and Deep Learning – Image Processing and Pattern Recognition – Evolutionary and Metaheuristic Algorithms The second volume, *Advances in Soft Computing*, contains 28 papers structured into two sections: – Natural Language Processing – Intelligent Applications and Robotics

2018 - 2019 Daily Weekly And Monthly Planner Two year planner for 2018 - 2019 including April 2018 - December 2019 (24 Month Calendar). Each monthly spread contains an overview of the month and a notes section. Weekly spreads include space to write your daily schedule as well as a to-do list. You can see 7 days Start with Monday to Sunday in the couple pages and also see the whole month too. Perfect bound to secure pages for the next two years and beyond. Give it for yourself, friends, family and co-worker and Have a great year together.

In this study, we look at the potential for development leaps in Africa in three key sectors that provided the basis for socioeconomic development around the world: health, education and agriculture. Advances in these sectors increase the human capital, create jobs and economic opportunities and have a positive influence on each other. Healthy and well-fed children can learn better; hygiene and better medical care diminish infant mortality, which reduces the desire for a large number of children; education for women promotes gender equality and causes birth rates to fall further. This creates a population structure under which the economy can grow particularly well: a demographic dividend becomes possible.

This book offers the latest advances and results in the fields of Machine Learning and Deep Learning for Wireless Communication and provides positive and critical discussions on the challenges and prospects. It provides a broad spectrum in understanding the improvements

in Machine Learning and Deep Learning that are motivating by the specific constraints posed by wireless networking systems. The book offers an extensive overview on intelligent Wireless Communication systems and its underlying technologies, research challenges, solutions, and case studies. It provides information on intelligent wireless communication systems and its models, algorithms and applications. The book is written as a reference that offers the latest technologies and research results to various industry problems.

This 8 x 10 inches weekly and monthly planner for 2018 to 2019 (Aug 2018 to Dec 2019) is perfect size for work, school and academic planning. It is a 17 months weekly planner starting from Aug 2018 to Dec 2019. Printed on high quality white interior stock paper with inspirational quote on the cover and inspirational quotes inside the planner as well. It offers lots of space to write your daily, weekly and monthly tasks and events. and to-do list. Full Specifications U.S Edition : Total Pages: 212 Pages-8 x 10 inches weekly and monthly planner-U.S Edition with U.S holidays-17-month calendar - 17 sheets of monthly calendar sheet- Weekly calendar sheets side-by-side for easy writing and viewing (Mon to Wed and Thurs to Sun for Aug 2018 to Dec 2019)- more than 12 pages of personal notes section for recording anything you need- Expense Tracking Sheet for each month from Aug 2018 to Dec 2019-Matte cover lamination - With motivational and inspirational quotes inside the planner and on cover- Quote On Cover - Don't Let Yesterday Take Up Too Much Today A perfect gift for friends and loved ones. A fascinating look at why human beings have a powerful mental, spiritual, and physical need for the natural world—and the profound impact this has on our consciousness and ability to heal the soul and bring solace to the heart, and the cutting-edge scientific evidence proving nature as nurturer. “The connection between mental health and the natural world turns out to be strong and deep—which is good news in that it offers those feeling soul-sick the possibility that falling in love with the world around them might be remarkably helpful.” —Bill McKibben Lucy Jones interweaves her deeply personal story of recovery from addiction and depression with that of discovering the natural world and how it aided and enlivened her progress, giving her a renewed sense of belonging and purpose. Jones writes of the intersection of science, wellness, and the environment, and reveals that in the last decade, scientists have begun to formulate theories of why people feel better after a walk in the woods and an experience with the natural world. She describes the recent data that supports evidence of biological and neurological responses: the lowering of cortisol (released in response to stress), the boost in cortical attention control that helps us to concentrate and subdues mental fatigue, and the increase in activity in the parasympathetic nervous system, slowing the heart and allowing the body to rest. “Beautifully written, movingly told and meticulously researched. An elegy to the healing power of nature. A convincing plea for a wilder, richer world.” —Isabella Tree, author of *Wilding*

In the framework of World Soil Day 2020, the Food and Agriculture Organization of the United Nations (FAO), the International Union of Soil Sciences (IUSS), and the Global Soil Partnership (GSP) launched a children's book contest on Soil Biodiversity with the motto "Keep soil alive, protect soil biodiversity". The book contest on soil biodiversity has given visibility to the importance of soil organisms and raised awareness on the urgency of protecting soil biodiversity. The soil biodiversity book competition highlights the importance of soil organisms and raises awareness of the urgent need to protect soil biodiversity among a young audience (children aged 6-11 years). This collection of 10 stories includes the best entries received from a total of 80 books spanning over 60 countries.

Despite potentially tremendous benefits, small and medium-sized enterprises (SMEs) lag in the digital transformation. Emerging technologies, as diverse as they are, offer a range of applications for them to improve performance and overcome the size-related limitations they face in doing business. However, SMEs must be better prepared, and stakes are high. SMEs make the most of the industrial fabric in many countries and regions, they create jobs (most jobs sometimes) and are the cement of inclusive and sustainable societies.

This book examines the challenges and impacts of poor diets and nutrition from current food systems and the potential contribution of biodiversity and ecosystem services in addressing these problems. There is a strong need for a multi-level, cross-sectoral approach that connects food biodiversity conservation and sustainable use to address critical problems in our current food systems, including malnutrition. Building on research from the Biodiversity for Food and Nutrition Project (BFN), which aims to better link biodiversity, diets and nutrition, the book presents a multi-country, cross-sectoral analysis of initiatives that have promoted local food biodiversity in four countries: Brazil, Kenya, Turkey and Sri Lanka. This book offers a comprehensive summary of the BFN Project results in each of the four countries along with lessons learned and how this work could be upscaled or applied in other regions. It argues that the strategic promotion and use of food biodiversity is critical in uniting attempts to address conservation, nutrition and livelihood concerns. The book is structured around chapters and case studies encompassing the BFN Project with specific experiences related by partners who played key roles in the work being done in each country. By offering a comparative view capable of furthering dialogue between the respective countries, it is also meant to connect the individual cases for a “greater than the sum of its parts” effect. This means consideration of how localized activities can be adapted to more countries and regions. Therefore, the book addresses global issues with a foot planted firmly in the grounded case study locations. This book will be of great interest to policymakers, practitioners and NGOs working on food and nutrition, as well as students and scholars of agriculture, food systems and sustainable development.

Peer research is increasingly used in international academic, policy and practice environments. It engages members of a group or social network as trusted members of a research team working in communities and settings they are familiar with. Critics, however, point to methodological concerns with peer research. These include the extent to which peer researchers genuinely represent the populations under study; data confidentiality; the emotional burden of enquiring into sensitive issues peers may experience in their own lives; and the reliability and credibility of data collected by people who do not have academic training. The book seeks to counter the marginalisation of research experience and skills derived from close relationships with people and communities, while reflecting critically on the strengths and limitations of peer research. Chapters by a wide range of international contributors illustrate the potential of peer research to facilitate an in-depth understanding of health and social development issues and enhance policy and practice. This interdisciplinary book provides students and professionals working in health, social science and development studies with a thorough grounding in this new style of research. It will appeal to those interested in research and evaluation; sexual health and public health; mental health, disability and social care; gender and sexuality; conservation and environmental management; migration and citizenship studies; humanitarian issues; and international development.

An in-depth investigation into Donald Trump’s business—and how he used America’s top job to service it. White House, Inc. is a newsmaking exposé that details President Trump’s efforts to make money off of politics, taking us inside his exclusive clubs, luxury hotels, overseas partnerships, commercial properties, and personal mansions. Alexander tracks hundreds of millions of dollars flowing freely between big businesses and President Trump. He explains, in plain language, how Trump tried to translate power into profit, from the 2016 campaign to the ramp-up to the 2020 campaign. Just because you turn the presidency into a business doesn’t necessarily mean you turn it into a good business. After Trump won the White House, profits plunged at certain properties, like the Doral golf resort in Miami. But the presidency also opened up new opportunities. Trump’s commercial and residential property portfolio morphed into a one-of-a-kind marketplace, through which anyone, anywhere, could pay the president of the United States. Hundreds of customers—including foreign governments, big businesses, and individual investors—obliged. The president's disregard for norms sparked a trickle-down ethics crisis with no precedent in modern American history. Trump appointed an inner

circle of centimillionaires and billionaires—including Ivanka Trump, Jared Kushner, Wilbur Ross, and Carl Icahn—who came with their own conflict-ridden portfolios. Following the president's lead, they trampled barriers meant to separate their financial holdings from their government roles. White House, Inc. is a page-turning, hair-raising investigation into Trump and his team, who corrupted the U.S. presidency and managed to avoid accountability. Until now.

Calendar) Each monthly spread contains an overview of the month and a notes section. Weekly spreads include space to write your daily schedule as well as a to-do list. Book Specification: - Name label in the first page will allow you to write your name or make it a gift for special one. - At-a-glance yearly calendar for 2018-2019 - 24 month calendar from January 2018 up to December 2019 - One month per each two page spread with blank notes section - 7 days notes block spread in 2 pages for each week with little blank space to draw and note whatever you like. - Quality paper made in USA Check out for more journal and planner including 2019 planner, 2 years, 3 years and 5 years planner by clicking at author page!

With the advent of the internet and handheld or wearable media systems that plunge the user into 360o video, augmented—or virtual reality—technology is changing how stories are told and created. In this book, John V. Pavlik argues that a new form of mediated communication has emerged: experiential news. Experiential media delivers not just news stories but also news experiences, in which the consumer engages news as a participant or virtual eyewitness in immersive, multisensory, and interactive narratives. Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image. He delves into developing forms such as virtual reality, haptic technologies, interactive documentaries, and drone media, presenting the principles of how to design and frame a story using these techniques. Pavlik warns that although experiential news can heighten user engagement and increase understanding, it may also fuel the transformation of fake news into artificial realities, and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality. Journalism in the Age of Virtual Reality offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public.

Fill Your Weeks with the Words of Jesus The words of Jesus soothe the soul like no others. Let His wisdom wash over you as you pencil in your goals, appointments, and special memories each week. And when you're done writing, you can pick up your crayons, colored pencils, watercolors, or markers and fill the beautifully illustrated pages with color. Make 2018 your best year ever as you meditate on beloved Scriptures, plan for the week ahead, and color Jesus' precious words.

This beautifully designed 2018-2019; July 2018-June 2019, 12 month, daily, weekly and monthly planner is a must-have organization tool for those who want to keep things under control while staying organized all year round. Product Details: July 1, 2018 to June 30, 2019 - Matte Finish Cover Design - 8 inches By 10 inches - Printed on Quality Paper - Calendar on each Monthly View (12 months) - Weekly spreads to record your everyday schedule - To-do-list section for each day of the week - Goals Review Section throughout the year to list your goals!

This book is a comprehensive guide to the surgery-first orthognathic approach for patients with malocclusion and skeletal disharmony, which has been successfully applied by the authors in their practices over the past 15 years. The approach breaks with the time-tested principles of traditional orthognathic surgery in that corrective bone surgery is performed first, without the removal of dental compensations, followed by orthodontic finishing. All aspects are covered with the aid of numerous illustrations, the aim being to provide surgeons with a systematic educational tool that will enable them to introduce the approach into their own practice. In addition, the book addresses one of the hot issues in orthodontics, occlusal plane-altering orthognathic surgery, in which surgical modification of the occlusal plane is employed to treat various types of dentofacial deformity and improve facial proportions. This promises to become a very powerful tool in modern orthognathic surgery.

A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal – that social and economic rewards should follow achievement rather than breeding – reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When The Meritocracy Trap reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.

The Perfect 2018-2019 Academic Planner

This book reports on the proceeding of the 5th International Conference on Intelligent, Interactive Systems and Applications (IISA 2020), held in Shanghai, China, on September 25-27, 2020. The IISA proceedings, with the latest scientific findings, and methods for solving intriguing problems, are a reference for state-of-the-art works on intelligent and interactive systems. This book covers nine interesting and current topics on different systems' orientations, including Analytical Systems, Database Management Systems, Electronics Systems, Energy

Systems, Intelligent Systems, Network Systems, Optimization Systems, and Pattern Recognition Systems and Applications. The chapters included in this book cover significant recent developments in the field, both in terms of theoretical foundations and their practical application. An important characteristic of the works included here is the novelty of the solution approaches to the most interesting applications of intelligent and interactive systems.

2018 - 2019 Weekly & Monthly Planner Two year planner for 2018 - 2019 including January 2018 - December 2019 (24 Month Calendar). Each monthly spread contains an overview of the month and a notes section. Weekly spreads include space to write your daily schedule as well as a to-do list. Everyone need to have the best planner since the first of the year. Give it for yourself friends family and co-worker and Have a great year together.

Pre-pandemic, Bosnia and Herzegovina's (BiH) economy was growing, but at a pace below the more successful countries in Eastern Europe. The pandemic generated a substantial output contraction in 2020. Early in the pandemic, the authorities successfully implemented restrictions to prevent the spread of the virus and took measures to support firms and households. However, the ongoing second wave poses additional challenges. A gradual recovery is expected for the second half of 2021. Political disagreements about policy coordination at the BiH State level have hampered program implementation under the 2016 EFF arrangement and the deepening of the single economic space. The challenge is to deal with the pandemic and put the economy on a higher medium-term growth trajectory.

The Latin American Economic Outlook (LEO) 2020 focuses on the role of digital transformation in helping to navigate through challenging times. The Covid-19 pandemic is having a profound impact on socio-economic conditions, accentuating the already complex scenario faced by a region with significant structural weaknesses. This unprecedented crisis comes at a time of high aspirations and reinforces the need to transform the very foundations of the development model in the region.

This book is intended to present the state of the art in research on machine learning and big data analytics. The accepted chapters covered many themes including artificial intelligence and data mining applications, machine learning and applications, deep learning technology for big data analytics, and modeling, simulation, and security with big data. It is a valuable resource for researchers in the area of big data analytics and its applications.
