

## Children Of The Matrix How An Interdimensional Race Has Controlled The World For Thousands Of Years

David Icke's spiritual journey leads him deeper into the world of global deception, a plan he calls a coup d'etat on the human mind. This book contains detailed information, plus an outline to solutions which will lead us into a glorious future in which humanity will be truly free.

Describes in simple language how children with ADHD live in and interact with the world. The writer is an executive at an agency for the differently abled who has four adopted sons with ADHD.

He a young man coming into his own. He's also a werewolf whose alpha nature is rising. She an older woman coming to terms with a major life change. She knows she has to deal with him, and she knows she shouldn't, but she finds herself falling for the guy. It's never easy.

The book interrogates the value of play as an essential component of learning, and the essential role of play in a technological society's aspirations for progress. Drawing upon the philosophy of technology, this book provides parents, teachers and teacher educators with a critique of predominant perspectives regarding the young child's increasingly hi-tech world.

Shares new documents to expose the sinister alien influence in world governments, financial systems, and scientific institutions throughout history • Shows how Eisenhower's treaty with the Greys, signed at Holloman Air Force Base in 1954, gave the aliens authority to abduct humans for "research" • Reveals how Reptilian-influenced ex-Nazis infiltrated the U.S. government • Explains how the Reptilians have created alien-human hybrids under their control to replace the human population Long ago, the Galactic Federation sent the Atlans, a fierce group of humans from the Pleiades, to Earth to confront the newest colony of the combative ever-spreading alien race known as the Reptilians. The ensuing battle sank the continent of Lemuria and drove the Reptilians underground beneath the Indian subcontinent as well as to Antarctica. Able to shapeshift to appear human, the Reptilians then infiltrated the Atlantean civilization, abducting humans and creating Reptilian hybrids. As Len Kasten shows, this technique of infiltration and hybridization prior to an all-out attack has been the hallmark of Reptilian conquest throughout the galaxy. Chronicling the history of the Reptilian Empire's influence on Earth and their conquest of 21 star systems, Kasten reveals how the human race is enmeshed in a skillfully concealed plot to enslave humanity and exploit our planet's physical and biological resources. Revealing Hitler's pact with extraterrestrials and the Reptilian influence on the Nazi state, he shares new documents that disclose the rescue and rehabilitation of Nazi war criminals to assist in the Cold War, which then corrupted many U.S. government institutions. Focusing on crucial events in the decade after World War II, he examines the Reptilians' human allies, the Illuminati, who control the levers of financial, technological, and military power throughout the world through various secret societies. He shows how Eisenhower's treaty with the Greys, signed at Holloman Air Force Base in 1954, gave the aliens permission to take humans up to their spaceships, ostensibly for genetic study--in return for alien technology--and how these abductions led to the creation of a hybrid race under Reptilian mind control. He also explains how Kennedy was assassinated by the CIA because of his plans to rout out this Nazi-Reptilian presence. Contrasting the Reptilians with the benevolent Ebens, the aliens from Zeta Reticuli who crashed at Roswell, Kasten exposes the stealthy tactics of the Reptilians, their relationship with the Greys, and their advanced genetic bio-technology and teleportation abilities--as well as what we need to do to defeat their plans.

The Matrix Conspiracy is the outbreak of a culture of self-assertion, where the classical deadly sins have been turned into virtues. It is a mixture of postmodern intellectualism, management theory, self-help and New Age, which is creating a "me-me-me-and-then-perhaps-you-if-it-serves-me-logic," and a spirituality, where the object of worship is the ego. It is a culture, where everything is psychologized, emotionalized and therapized, so that political incitation and social responsibility are removed by disguising social problems as personal problems. It is a culture where moral values only are based on what feels good. It is a culture of suspicion, that denies and renounce what people think, and the reasons they produce, in order to find the "real" reasons. It is a culture, where debate is about playing down or directly offending other people. It is a culture, where science and critical thinking have been replaced by magical thinking (you can create yourself and the world as it fit you). But it is also a culture (though it on the surface sounds individualistic), which is about to develop into a global, totalitarian meritocracy, where psychology is controlling people down to the smallest details. This might happen when Western Consumer Capitalism and Chinese Communism in all probability will melt together.

How an interdimensional race has controlled the planet for thousands of years - and still does.

In the movie The Matrix, the character Morpheus offers two pills to Neo—if he takes the blue pill, he will go on with life as he has before, believing what he has always believed. If he takes the red pill, he will find out what the “matrix” really is, and many of his earlier beliefs will be shattered. When it comes to taking a hard look at a specific set of beliefs about parenthood and reproduction that has driven our society for generations, The Baby Matrix is the red pill. The Baby Matrix looks at long-held beliefs about parenthood and reproduction, and unravels why we believe what we believe. It lays out: We commonly think our desire to have children boils down to our biological wiring, but author Laura Carroll says it's much more than that. Unlike other books on parenthood, The Baby Matrix: Why Freeing Our Minds From Outmoded Thinking About Parenthood & Reproduction Will Create a Better World takes a serious look at powerful social and cultural influences that drive the desire for the parenthood experience, and lays out why we need to be very aware of these influences to make the most informed decisions about parenthood. -the historical origins of beliefs about parenthood and reproduction -why many of these beliefs no longer work for society or were never true in the first place -why we continue to believe them anyway -the prices society pays as a result The Baby Matrix shows us how we got here, brings to light what is true, which includes knowing about the powerful influence of “pronatalism,” and explains why society can no longer afford to leave pronatalism unquestioned. “This is not a book about convincing people not to have children,” says Carroll. “I want people to be very aware of the long-held social and cultural pressures, and be able to free themselves from those pressures when making parenthood choices. This will result in more people making the best decisions for themselves, will foster a society in which those who are best suited to become parents are the ones who have children and one that knows what it means to bring a child into the world today.” This book will make you examine your own intentions and beliefs, will rile you, and might just change your mind. Whether you are already a parent, want to become a parent, are still making up your mind, or know you don't want children, you'll never think about parenthood in the same way. The Baby Matrix is a must-read for anyone interested in psychology, sociology, anthropology, parenting issues, environmentalism, and social justice. But most of all, it's for anyone, parent or not, who reveres the truth and wants the best for themselves, their families, and our world.

It's amazing how dominant information is in the modern world. In fact, it's so dominant that it begs the question, “What if information does not only define and shape our world—what if it is in fact reality”? The 1999 film The Matrix and its sequels were predicated on just this idea. Of late, the sultans of Silicon Valley have become obsessed with this

idea, which is known as the simulation hypothesis. Elon Musk himself has remarked, "There's a billion-to-one chance we're living in base reality." Perhaps information doesn't just define and shape our reality. Perhaps it's entangled in the fabric of reality through the mind of the observer. Consider the philosophical thought experiment: if a tree falls in the forest and no one is there to hear it, does it make a sound? It takes a mind to experience reality. In this book, I chronicle the journey that led me to discover the missing link between science and spirituality: the information-bit. Legendary theoretical physicist John Wheeler's "it-from-bit" theory and my own Quantum Mind model are ultimately rooted in the same thing: data. Wheeler suggested that the reality of physics—the "it"—is based on patterns of information, or "bits." I theorize that our actions in the real world unfold in sync with the underlying information-thought blueprints that exist in our mind. Buddha once said, "The mind is everything. What you think, you become." This bi-directional dialogue across the mind-body connection may well occur at the Planck scale, where the transition between quantum physics—the bit—and classical physics—the it—operates. But where do the mind and body meet? Purpose, which emerges from knowing oneself, unifies the wisdom of the East with the pragmatism of the West. The energy derived from what has meaning to the self is the fuel that allows individuals to manifest in the physical reality (via the body) the bit arrangement contained in the micro realm of their mind. If its point of origin is love, this route leads to inner peace and harmony and draws a vector unifying the mind, heart, and body.

This pamphlet is an essay enabling individuals to distinguish between 'black' and 'white' magic, thereby avoiding practices and disciplines which may be detrimental to character and dangerous to physical health. As Paracelsus noted centuries ago, the invisible

realms of nature are governed by immutable laws which cannot be violated with impunity. In recent years researchers in many fields have been exploring the hidden side of life and nature, but few of them have given serious consideration to the moral and ethical responsibilities associated with their labors. The tendency has been to assume that the transcendental arts, like the resources of the physical world, can be exploited without regard for consequences. As in the case of the sorcerers of long ago, the principal objective is the binding of invisible energies for the advancement of personal ambitions. Many innocent persons have become involved in magical practices and disciplines which are detrimental to character and dangerous to physical health. The abuse of powers and forces as yet but partly understood must result in both psychical and psychological tragedy. In this little essay, I have attempted to present in concise form a code of rules which, if faithfully followed, will protect both the individual and society. We are fully aware that the materialistic approach on any level of esoteric knowledge is contrary to the universal plan. We must all accept the burdens that come from the exploration of natural mysteries and dedicate our findings to the glory of God and the well-being of all humanity. Topics include: Children of the False Darkness The Philosophy of Opportunity The Fruitage of Black Magic: The Left-Hand Path The Fruitage of White Magic: The Right-Hand Path The Mechanics of Opportunity Definitions of Magic The Power of Demons The Source Power in Magic The Power of Black Magic The Démoniacal Powers of the Ancients Spiritual Research The Mechanics of Magic

*Children of the Canyon* tells the story of David, a boy growing up in L.A.'s fabled Laurel Canyon neighborhood as the 1960s counterculture is coming to an end. David's record producer father works with the reclusive former leader of a surf music band on an album that promises to elevate the legacies of both men to immortal status. His distant, peripatetic mother rides the waves of activism and feminism in and out of David's life. The elusive Topanga, named for the city's last remaining Eden, whom David meets on the beach the night of his parents' separation continues to elude his futile attempts to reconnect with her throughout the decade. Through David's eyes, we bear witness to the fallout from the California Dream's malfunction: the ruined families, failed revolutionaries, curdled musical idealism, and, ultimately, the rise of the conservatism that put the country on its present path.

Where the bloodlines of the Nephilim leave off, the real story just begins. Or does it go back even further than that? The very real probability that non-human intelligences visited and even copulated with primordial humans is detailed in civilization's most ancient cultural and religious records. These historical records further reveal that these intelligences were reptilian in nature—or, at the very least, have been represented throughout human history in reptilian form. From the Serpent, Nawcash, in the Garden of Eden; Atum, the Egyptian snake-man; and Quetzalcoatl, the feathered serpent god of the Mayans to the double-helix snake symbol of Enki/Ea in ancient Sumerian literature, the serpent has been the omnipresent link between humans and the gods in every culture. In *The Secret History of the Reptilians*, Scott Alan Roberts investigates and examines the pervasive presence of the serpent in human history, religion, culture, and politics. Are we the product of an extraterrestrial race that moves and breathes—and even breeds—beneath the surface of all of human history? Put on your thinking cap and take an historical, anthropological, archaeological plunge into the heady waters of extraterrestrial origins.

AN INSTANT NEW YORK TIMES BESTSELLER FINALIST FOR THE 2021 NATIONAL BOOK AWARD FOR FICTION "A relentless exhibition of Groff's freakish talent. In just over 250 pages, she gives us a character study to rival Hilary Mantel's Thomas Cromwell ." – USA Today "An electric reimagining . . . feminist, sensual . . . unforgettable." – O, The Oprah Magazine "Thrilling and heartbreaking." –Time Magazine "[A] page-by-page pleasure as we soar with her." –New York Times One of our best American writers, Lauren Groff returns with her exhilarating first new novel since the groundbreaking Fates and Furies. Cast out of the royal court by Eleanor of Aquitaine, deemed too coarse and rough-hewn for marriage or courtly life, seventeen-year-old Marie de France is sent to England to be the new prioress of an impoverished abbey, its nuns on the brink of starvation and beset by disease. At first taken aback by the severity of her new life, Marie finds focus and love in collective life with her singular and mercurial sisters. In this crucible, Marie steadily supplants her desire for family, for her homeland, for the passions of her youth with something new to her: devotion to her sisters, and a conviction in her own divine visions. Marie, born the last in a long line of women warriors and crusaders, is determined to chart a bold new course for the women she now leads and protects. But in a world that is shifting and corroding in frightening ways, one that can never reconcile itself with her existence, will the sheer force of Marie's vision be bulwark enough? Equally alive to the sacred and the profane, Matrix gathers currents of violence, sensuality, and religious ecstasy in a mesmerizing portrait of consuming passion, aberrant faith, and a woman that history moves both through and around. Lauren Groff's new novel, her first since Fates and Furies, is a defiant and timely exploration of the raw power of female creativity in a corrupted world.
