The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Do you feel safe in crowds? Are you confident that your loved ones know how to protect themselves in a crowd? Each day, we hear news accounts of injuries and deaths where people have been involved in some sort of crowd-related incident. Whether at a house party, on a balcony, at a wedding, standing in line for a special holiday sale, on a train platform or in crowds. Crowding, stampeding, trampling, suffocation, with no avenue of escape, is the number one cause of multiple injuries and deaths in crowds. Crowds increase or decrease from a few people to thousands in a matter of minutes. It is within this period that the greatest potential for serious problems arises. Often, people attending an event and other gatherings are not aware of the dangers that lurk within crowds. Their excitement and attention is usually focused on the event and other activities and not how to protect themselves. This book will teach you Crowd Safety and Survival Technique. The life you save may be your own or a loved one.

This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) – the largest in India in this area – written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been "Design for a Connected World". While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc.

as well as new and emerging methods and tools to design new products, systems and services.

Anyone who's ever seen or attended the PDC World Darts Championships knows that darts is no ordinary sport. Where else would you find world-class superstars, in the midst of a championship match, cultivating tomorrow's banging hangover? Or two separate organisations, with a bitter historical rivalry, taking potshots at each other in a bid to secure players, fans and an all-important TV broadcast contract? And then there's the fans... Darts fans are unlike any other fans in world sport. They drink the most, they wear the silliest costumes, they sing the loudest and yet they can arguably

see the least live action. They feel an immense pride and ownership for the game – its theirs, and they couldn't care less about the sneers from the mainstream. Join King ADZ as he dives headfirst into this tempestuous world, meeting former legends, future stars, dominant Internationals, the owners, the referees and of course the fans. Darts may be a simple game to many, but to most it's absolute mayhem.
